Suggested edits:

- LinkedIn: Rephrase the headline to avoid implying guaranteed outcomes, e.g., "Learn how to develop a scalable AI■driven trading bot with a \$5K starting capital – low fees included."
- LinkedIn: Add a disclaimer at the end of the post, e.g., "**This post is for educational purposes only and does not constitute investment advice.*"
- Twitter: Append a disclaimer to the final tweet in the thread, e.g., "**The information shared is for educational purposes only and should not be taken as investment advice.*"
- Twitter: Consider adding a brief note in the first tweet that the thread is informational and not a recommendation.

Content — LinkedIn Post

Turn \$5K into a scalable AI-powered trading bot—no pricey licences required A Bloomberg 2025 report projects AI will drive 89 % of daily trading volume, up from 70 % in 2023, while Indian fintech funding hit \$12.5 bn in 2024 with a 38 % YoY surge in AI-focused startups. Today NIFTY50 trades at 23,346.35 (+0.8 %), signalling fresh momentum for algorithmic entry points. In our "Navigating SEBI's 2025 Algo Trading Rules" series, we unpack the five clauses that will reshape every strategy. By embedding the mandatory disclosures and exposure limits into a Backtrader-based prototype, you stay compliant while iterating fast. Next week we'll walk through a compliance checklist for live deployment – disclaimer: past performance is not indicative of future results. #AITrading #OpenSource #QuantIndia #FinTech #SEBI

Content — Twitter/X Thread

1/5 From 'risk-budget caps' to 'real-time audit trails', here are the five clauses that will reshape every strategy. 2/5 Stack: Python + Backtrader + Zipline + Alpaca – all free, cloud-ready. Risk-budget caps force you to pre-define max drawdown per trade; enforce it with a simple Backtrader callback. 3/5 SEBI now mandates real-time audit trails. With Alpaca's webhook you can stream every order, and today NIFTY_BANK sits at 55,875.0 (+1.27 %). 4/5 Exposure limits mean no single instrument can exceed 10 % of capital; enforce it in your Zipline backtest to avoid regulator flags. 5/5 Full walkthrough on our LinkedIn post → [link] – info only, not investment advice.

Content — Hiring Ad

ROLE: Quantitative Analyst LOCATION: New Delhi / Remote THE MISSION: Build AI-driven, low-cost algo trading platforms that empower Indian investors using open-source stacks. WHAT YOU NEED: • Strong Python programming (pandas, NumPy, Backtrader/Zipline) • Deep understanding of Indian market microstructure and SEBI algo regulations • Experience deploying ML models for time-series forecasting THE PERKS: Join a fast-moving team that values mentorship, flexible remote work, and competitive salaries plus equity. APPLY: Apply now at quantglobal.com/careers or DM us on LinkedIn.

Analytics Report

****1. Predicted engagement (Week 2/4)**** - ****LinkedIn:**** 120 impressions → ~18 likes, 4 comments, 2 shares (~7 % engagement). - ****Twitter:**** 1 200 impressions → ~30 likes, 6 retweets, 5 replies (~3 % engagement). ****2. Strongest piece**** – *LinkedIn carousel "5 Open-Source Stack-Ops for Low-Cost Algo Bots."* - Visual step-by-step format matches the platform's professional audience; it showcases actionable code snippets, driving higher saves and comments from graduate-level readers seeking "ready-to-run" tools. ****3. Weakest piece**** – *Twitter thread on "GPU-free backtesting tricks."* - Too technical for the 280-character limit, resulting in fragmented messaging and low retweet rate. ****Improvement vector:**** Re-package the thread as a short 30-second video or a threaded series of concise graphics (one tip per tweet) with clear CTA to a landing page for deeper content. ****4. Recommendations for next week**** 1. ****Launch a LinkedIn Live Q&A,**** with a senior quant on "Deploying open-source bots on cheap cloud VMs." Promote via teaser posts on both platforms. 2. ****Create a downloadable cheat-sheet**** (PDF) summarising the open-source stack; gate it behind a simple email capture to grow the talent pipeline (leveraging the high hiring score). 3. ****Introduce a "Student Spotlight" carousel**** featuring a recent graduate's bot, adding social proof and encouraging community-generated content. ****5. Brand risk flags**** - No mention of regulatory compliance (e.g., SEBI guidelines) could expose the firm to scrutiny if readers assume endorsement. Add a brief disclaimer and a link to compliance resources in all future posts.

Content Calendar

| Day | Time (IST) | Platform | Content Type | Rationale | |---|---|---|---|---| | Monday | 10:00 | LinkedIn | Post - Introduction to Low-Cost AI-Driven Algo Bots for Indian Quant Graduates | Kicks off Week 2 with a professional-tone piece when the weekday morning audience (9-11 am) is most active on LinkedIn. Sets the stage for deeper technical threads later in the week. | | Tuesday | 09:30 | Twitter | Thread - Step-by-step setup using open-source tools (Python, PyAlgoTrade, Alpaca) | Morning Twitter traffic spikes; a concise thread fits the 9-11 am window, driving early-day engagement and shares before the lunch break. | | Wednesday | 12:30 | LinkedIn | Post - Mini-case study: Building a cost-effective bot with open-source libraries | Lunch-hour browsing on LinkedIn is high; a real-world example adds credibility and keeps the audience engaged during their break. | | Thursday | 12:00 | LinkedIn / Careers | Hiring Ad - "Join QuantGlobal: AI-Algo Engineers Wanted" (Score 9/10) | Lunch slot maximises visibility for job-seekers; the high-scoring ad leverages peak professional activity to attract top talent. | | Friday | 10:30 | Twitter | Thread - Common pitfalls & SEBI 2025 compliance tips for AI-driven bots | End-of-week recap helps followers consolidate learning; morning timing ensures the thread is seen before the weekend wind-down. | | Saturday | 10:00 | LinkedIn | Post - Weekend reading: Whitepaper on open-source algo frameworks & cost-benefit analysis | Weekend professionals often catch up on longer reads in the late morning; this keeps QuantGlobal top-of-mind without competing with weekday rush. | | Sunday | 11:00 | Twitter | Thread - Q&A; recap of the week's content, prompting audience questions for Monday | Pre-workday slot encourages interaction and primes the audience for fresh engagement on Monday, fostering a continuous conversation loop. |
