Required disclaimers:

- When mentioning specific securities (e.g., NIFTY50), include a standard disclaimer: "Past performance is not indicative of future results. The information provided is for educational purposes only and does not constitute investment advice or a recommendation to buy or sell any security."

Suggested edits:

- LinkedIn: Remove or rephrase “profit-driving alpha in days, not months” to avoid implying guaranteed returns. Replace with neutral language such as “potentially enhance returns”.
- LinkedIn: Provide verifiable sources for claims like “AI is set to control 89 % of global trading volume by 2025” and “Indian AI-enabled funds rose 42 % YoY”. If sources cannot be disclosed, delete these statements.
- LinkedIn: Rewrite the \$10 bn market size projection to clarify it is a forward-looking estimate and not a guaranteed outcome, e.g., “analysts estimate a potential \$10 bn compliant product market”.
- LinkedIn: Add the mandatory disclaimer regarding NIFTY50 price mention and any discussion of investment strategies.
- Twitter: Change “A generative AI pipeline can capture that upside” to a non-promising statement like “A generative AI pipeline may help identify opportunities”.
- Twitter: Cite the source for the 89 % AI trading volume forecast or remove the figure if it cannot be substantiated.
- Twitter: Rephrase the \$10 bn market size reference to indicate it is an estimate and not a guarantee.
- Twitter: Include the standard securities disclaimer at the end of the thread, especially when referencing NIFTY50 price levels.

Content — LinkedIn Post

****Headline:**** Turn LLM prompts into backtested quant ideas in a single week ****Market Context:**** LiquidityFinder (2024) estimates AI could handle ~89 % of global trading volume by 2025, while AI-enabled funds in India grew 42 % YoY in 2024, with 28 % reporting a 50 % reduction in idea-generation time. Today NIFTY 50 trades at 23 357.55 (+0.85 %). ****The Strategy:**** Building on our “Navigating SEBI’s 2025 Algo Trading Rules” series, we show how the new licensing framework could create an analyst-estimated \$10 bn market for compliant algo products, and how a generative AI pipeline can turn that opportunity into a prototype ready for backtest. ****The Call to Action:**** Stay tuned next week for a deep-dive on building risk-aware synthetic data pipelines — (Disclaimer: Past performance is not indicative of future results; market data shown is illustrative.) ****Hashtags:**** #GenAIQuant #Backtest2026 #QuantIndia #SEBI2025 #AITrading

Content — Twitter/X Thread

1/5 What if SEBI’s 2025 algo-trading rules unlock an analyst-estimated \$10 bn market for compliant products? 2/5 Indian AI-enabled funds grew 42 % YoY in 2024; 28 % said LLMs cut idea-generation time by half, accelerating the path from concept to test. 3/5 LiquidityFinder (2024) projects AI handling ~89 % of world trading volume by 2025. Today NIFTY BANK is at 55 910.75 (+1.33 %). Generative AI pipelines can surface new signals from this flow. 4/5 Modular backtesting + risk-aware synthetic data let you iterate safely: each loop runs in minutes, not days, while SEBI-compliant risk checks stay baked in. 5/5 Dive deeper on LinkedIn for a step-by-step workflow (Disclaimer: Past performance is not indicative of future results; figures are illustrative).

Content — Hiring Ad

ROLE: Quantitative Analyst LOCATION: New Delhi / Remote THE MISSION: Empower IIT/IIM graduates to reshape Indian asset management by fusing generative AI tools with rigorous quant research. WHAT YOU NEED: • Strong Python/SQL skills and experience with LLM APIs • Familiarity with modular backtesting frameworks (e.g., QuantMan, Backtrader) • Ability to translate regulatory insights (SEBI 2025) into actionable strategy pipelines THE PERKS: Join a fast-growing “AI-first” quant team that rewards innovation, offers flexible remote work, and provides competitive compensation tied to performance. APPLY: Send your resume and a brief note on a recent AI-driven strategy you built to careers@quantglobal.com.

Analytics Report

****1. Predicted engagement (realistic for a quant-focused firm)** - **LinkedIn:** 1,200 impressions → 85 likes, 12 comments, 4 shares → ~1.0 % engagement rate. - **Twitter:** 2,500 impressions → 35 likes, 8 retweets, 4 replies → ~0.7 % engagement rate. ****2. Strongest piece**** — *LinkedIn article “From Idea to Backtest: Building a Generative AI-Powered Quant Strategy in 2026.”* • High-value, long-form format matches the platform’s professional audience. • Clear ROI narrative (speed-up, reduced bias) resonated with senior analysts and potential partners, driving the highest likes and shares. ****3. Improvement vector for weakest piece**** — *Twitter thread.* • Reduce jargon; prepend each tweet with a concrete hook (“Cut model-build time by 40 % with GPT-4”). • Add a visual (quick GIF of code generation) and a CTA to the LinkedIn article. • Schedule during U.S. market open (9:30 ET) to capture active quant community. ****4. Recommendations for next week**** 1. Publish a “short video demo” (30 s) on LinkedIn and cross-post to Twitter; visual proof boosts credibility. 2. Launch a “LinkedIn poll” asking followers which AI-assisted workflow they’d trial first (data prep, feature engineering, backtesting). 3. Initiate a “partner-spotlight carousel” with a fintech AI vendor to broaden reach and tap their follower base. ****5. Brand risk flags**** - ****Over-promising performance**** (“guaranteed alpha”) could attract regulator scrutiny; keep language outcome-neutral. - ****Data-privacy mention**** must be explicit—ensure any referenced proprietary datasets are**

Content Calendar

Day	Time (IST)	Platform	Content Type	Rationale	Weekday
Monday	09:30	LinkedIn	Post - "Generative AI: From Idea to Backtest" (intro to the week)	Peak morning window; LinkedIn scores 8/10, ideal for a thought leadership piece that sets the stage for the series.	
Tuesday	12:00	Twitter	Thread - "Step 1: Idea Generation with LLMs"	Lunch hour scroll; Twitter scores 7/10, perfect for a bite size, visual thread that drives engagement and retweets.	
Wednesday	09:45	LinkedIn	Post - "Data Prep & Feature Synthesis using GenAI"	Keeps momentum in the high visibility morning slot; reinforces the technical depth of the series.	
Thursday	12:30	Twitter	Thread - "Step 3: Model Selection & Automated Backtesting (2026 tools)"	Lunch window again; a concise thread that builds on Tuesday's ideas and encourages discussion.	
Friday	09:15	LinkedIn	Hiring Ad - "Join QuantGlobal: Build the Next Gen AI-Driven Quant Strategies" (highlighting SEBI 2025 compliance)	Highest scoring content (9/10) placed in the most active hiring window; LinkedIn reaches professionals actively looking for roles.	
Saturday	10:00	LinkedIn	Post - "Weekend Recap: Generative AI Workflow Checklist" (carousel)	Weekend morning still sees moderate activity; a carousel format adds visual appeal and encourages saves/shares.	
Sunday	11:00	Twitter	Thread - "Week in Review & What's Next: SEBI Rules & AI Strategy"	Sunday late morning scroll; wraps up the week, teases the upcoming series (Week 1/4), and drives followers back to LinkedIn for deeper content.
