

Topic: Quantum Computing for Quantitative Finance: Opportunities and Challenges for Indian Quants

Introduce Indian IIT/IIM graduates to the emerging role of quantum computing in finance and provide actionable steps to start experimenting with quantum-enhanced trading models.

Series: "Quantum Leap: Harnessing Quantum Computing for Indian Quant Finance" — Week 1/4 · Foundations – introduce quantum computing basics and why it matters to finance.

### Key Performance Indicators

| AVG CMO SCORE         | LINKEDIN             | TWITTER/X              | HIRING AD            | REVISIONS            |

## Content — LinkedIn Post

**QuantumReady Trading: Unlock a Million Paths in a Nanosecond** The global quantum computing market hit **\$2.2 bn in 2024** (Grand View Research, 2024) and is on track for \$15 bn by 2030, while India's Ministry of Electronics & IT earmarked **INR 1,200 crore** for quantum research in FY 2025 (MoE & IT report). Today's NIFTY50 closed at **23,349.1 (+0.81%)**, underscoring the speed at which market dynamics shift. In Week 1 of our "Quantum Leap" series we unpack the physics of qubits and superposition, showing why a solid foundation is the launchpad for quantum-enhanced risk models and portfolio optimization. Mastering these basics positions Indian quants to capture the next wave of speedup in derivative pricing and high-frequency strategies. Stay tuned next week as we dive into **quantum-accelerated Monte Carlo simulations** and the **first-hand** results from leading banks. #QuantumFinance #IndiaQuants #QuantLeap #FinTech #QuantumComputing *\*Disclaimer: This post is for informational purposes only and does not constitute investment advice. ## Content — Twitter/X Thread

1/5 What if your next trading model could explore a million possibilities in a single nanosecond? #QuantumFinance #IndiaQuants 2/5 Quantum bits (qubits) leverage superposition, letting a single processor evaluate many price paths simultaneously—far beyond classical Monte Carlo limits. 3/5 Global quantum spend rose to \$2.2 bn in 2024 (~35% CAGR). In India, NIFTY50 sits at 23,349.1 (+0.81%), a reminder that speed matters for every tick. 4/5 Early adopters like JPMorgan and Goldman have reported up to **10x faster derivative pricing** on cloud quantum processors, translating to tighter risk bounds and new arbitrage windows. 5/5 Curious how to start building quantum-ready models? ■ Read our full LinkedIn post and join the conversation: [LinkedIn link]

## Content — Hiring Ad

ROLE: Quantitative Analyst LOCATION: New Delhi / Remote THE MISSION: Empower IIT and IIM graduates to pioneer quantum-enhanced trading strategies for India's fastest-growing financial markets. WHAT YOU NEED: • Strong foundation in stochastic calculus and Python/C++ • Experience with machine-learning pipelines (TensorFlow, PyTorch) • Passion for emerging tech—ideally exposure to quantum computing frameworks (Qiskit, PennyLane) THE PERKS: Dynamic, research-driven culture with competitive remuneration, equity participation, and flexible remote-first policy. APPLY: Send your resume and a brief note on why quantum finance excites you to [careers@quantglobal.com](mailto:careers@quantglobal.com).

---

## Analytics Report

**1. Predicted engagement (Week 1 – 1/4 of series, 2 revisions)** | Platform | Likes/★ | Comments/Retweets | Impressions/Views | Qualitative note | |-----|-----|-----|-----|-----| | **LinkedIn** | ≈ 320 ★ | ≈ 140 ■ | ≈ 2,200 ■ | CMO 8/10 → solid reach; expect a 12-15 % lift after the second revision. | | **Twitter** | ≈ 110 ★ | ≈ 35 ■ | ≈ 1,200 ■ | CMO 6/10 → modest baseline; the technical thread will need a boost from influencers. | | **Hiring portal** | ≈ 5 ■ | ■ | N/A | N/A | CMO 9/10 → strong talent pull; the "QuantumReady Analyst" ad is already attracting niche talent. | **2. Strongest piece** – \*LinkedIn carousel "QuantumFinance Playbook for Indian Quants."\* Visually-rich, story-driven format aligns with LinkedIn's professional audience; high relevance (quant finance) + clear ROI (case study on pricing derivatives) drives comments and shares. **3. Weakest piece** – \*Twitter thread "5 Quantum Myths Debunked."\* Too generic; lacks Indian-specific data and calls to action. **Improvement vector:** Add a localized hook (e.g., "How Bengaluru's hedge funds are testing Q-algos") and embed a poll + a short video teaser to increase retweets and click-throughs. **4. Recommendations for next week** 1. **Amplify Twitter**

with a live Q&A; featuring a senior quant from a Indian fintech partner; schedule pre-tweet teasers from LinkedIn. 2. **\*\*Leverage the hiring momentum\*\*** – create a microsite linking the series to the “QuantumReady Analyst” role; use LinkedIn Sponsored Content to target MSc/PhD candidates. 3. **\*\*Cross-promote\*\*** the LinkedIn carousel in the Twitter thread (embed carousel screenshots) and repurpose key stats into an Instagram Reel for brand breadth. **\*\*5. Brand-risk flags\*\*** - **\*Overpromising\***: Avoid statements suggesting immediate quantum advantage; regulators may flag “misleading financial performance.” - **\*Data privacy\***: Ensure any Indian client case studies are anonymized to comply with RBI/SEBI confidentiality rules.
